

## Add Savings & Security to Signing

ezSigner™

Secure Signatures & Graphics

### Signing Made Easy and Secure

Are you still handsigning checks? Does your organization use a check signing machine or rubber stamps? Secure signing can be made easy with ezSigner, an economical solution that adds convenience, security and savings to the process of placing signatures or security graphics on any document.

Security passwords hold the key to unlock and place any signature or security graphic on a document. Common graphic files can be imported into ezSigner then securely encrypted (256-Bit AES encryption) and linked with a password. Only the specific password holds the power to print the encrypted signatures or graphics. Save time and increase your security by signing all your security documents with the ezSigner.

Stop using manual processes to sign checks and forms. ezSigner is your solution to save time and money.

### The ezSigner Solution

- Secure any signature or graphic with a password.
- Review all documents, and then securely add a signature or graphic.
- Save money and time by eliminating the manual task of handsigning important documents.
- Eliminate check signing machines and rubber stamps.
- Additional levels of signature protection:

**Signature Feathering** – A unique background, individually developed and placed behind the signature – You have the choice of style and color.

**Secure Mark** – A unique security graphic, printed while the check is being signed – Additional graphics and watermarks can be included.

- You can scan and import graphic files, or have an AP graphic artist clean your files for optimum print output.

#### System Requirements

- 16 MB RAM (32 MB RAM recommended), 2 MB available on hard disk
- Windows™ 95/98/NT/2000/ME/XP/XP PRO/Vista
- SVGA color monitor with 800x600 resolution capability (recommended)
